-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 12/16/06
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 89,92,93,95-99,102,103,105-108,138-140,144-146,151,153 and 154 is/are pending in the application.
- 4a) Of the above claim(s) _____ is/are withdrawn from consideration.
- 5) ☐ Claim(s) _____ is/are allowed.
- 6) ☒ Claim(s) 89,92,93,95-99,102,103,105-108,138-140,144-146,151,153 and 154 is/are rejected.
- 7) ☐ Claim(s) _____ is/are objected to.
- 8) ☐ Claim(s) _____ are subject to restriction and/or election requirement.

Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☐ The drawing(s) filed on _____ is/are: a) ☐ accepted or b) ☐ objected to by the Examiner.
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

Priority under 35 U.S.C. § 119

- 12) ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☐ All b) ☐ Some * c) ☐ None of:
1. ☐ Certified copies of the priority documents have been received.
 2. ☐ Certified copies of the priority documents have been received in Application No. _____.
 3. ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).
- * See the attached detailed Office action for a list of the certified copies not received.

DETAILED ACTION

1. This communication is in response to amendment filed 12/16/2005.

Continued Examination Under 37 CFR 1.114

2. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 4/6/05 has been entered.

Response to Amendment

3. Claims 89, 95-99, 105-108, 138, 140, 151 and 153-154 have been amended. Claims 89, 92-93, 95-99, 102,103, 105-108, 138-140, 144-146, 151, 153-154 are currently pending.

Response to Arguments

4. Applicant's arguments with respect to previously rejected claims under 35 USC 103(a) over Newsbyte and Official Notice have been considered but are moot in view of the new ground(s) of rejections. Nonetheless, the examiner points out that, the applicant's argument that, in the current practices of "Going Once, Going Twice.." annunciated by an auctioneer, it is a common practice to continue the auction until a new higher bid (one higher from the last bid

Art Unit: 3624

which is the highest bid up to that point in time) is received from the participating bidders. In other words, a correlation does exist between the new bid and the previously received bid in that the new bid is a higher bid or more favorable to the auctioning party (either seller or a buyer) and the auction is extended (or continues) until no further higher bid is received for a reasonable period of time.

Claim Rejections - 35 USC § 103

4. Claims 89, 92-93, 95-99, 102,103, 105-108, 138-140, 144-146, 151, 153-154 are rejected under 35 U.S.C. 103(a) as being unpatentable over Newsbyte and further in view of Officially taken notice.

Claim 89: Newsbyte discloses a method to control overtime in an overtime auction (online auction - title), comprising:

defining a first time interval ..during which bids are submitted to the auction for a first lot (“..between three and fourteen days including “the final ten minutes”, assumed now on that this is 3 days), a second time interval (the auction is extended in “ten-minute increments”, the second time interval amounts to 3 days plus 10 minutes (one increment)), and a first closing time..(3 days after the start of the auction), wherein the first closing time is defined as a specific scheduled closing time (closing time is initially defined as 3 days from the starting time, i.e. if the starting time is 12:00 AM Sunday then the scheduled closing time would be 12:00 AM Wednesday);

determining that at least one new bid for the first lot is received by a server ..during the first time interval, the at least one new bid being received close to the first closing time;

Art Unit: 3624

(“If any bidding occurs in the final ten minutes..” this requires determining that at least one bid is received close to the first closing time (i.e. late or towards the scheduled closing of the auction)

extending the first closing time using the second time interval (in the example earlier cited in step (a) the “initial” closing time of 3 days is extended by second time interval to 3 days and 10 minutes. Note that the first closing time is 12:00 AM Wednesday which now extended using the second time interval (i.e. 10 minutes) to 12:10 AM);

wherein the server and ..bidder participating in the auction are coupled over a communication network during the auction (Excite auction is “online” excite being a sponsor);

wherein the first closing time corresponds to an end of the first time interval if the first closing time is not extended in step (c) (first time interval is 3 days which is the first closing time), and ... corresponds to an end of the second time interval if first time interval is extended (auction is closed in 3 days plus 10 minutes if extended).

Newsbyte fails to teach, however, Official notice is taken that “buyer driven” auctions are old and well known wherein a buyer defines a lot or the item to be auctioned. It would have been obvious to one of ordinary skill in the art at the time of the invention to apply the Newsbyte concept of extending the first closing time using the second closing time which is disclosed for a “seller driven” auction to a “buyer driven” auction (wherein a buyer defines a lot to be auctioned and the buyer desires to buy the item(s) at the lowest price from a plurality of sellers).

It would have been obvious to one of ordinary skill in the art to have the lot defined by a buyer and combine with the teaching of the Newsbyte reference so as to allow the buyer or administrator of the auction to control various timing elements per the foregoing analysis so as to

Art Unit: 3624

keep the auction running even beyond the scheduled closing time so long as bids which are lower or higher than the best bid previously received keep arriving since this would allow the buyer or seller of the lot of goods to receive most desired price from the bidders.

Newsbyte fails to teach, however, Official notice is taken that extending the first closing time interval (i.e. extending the auction time) if a newly received bid is higher than the previous highest bid (the correlation between the new bid and the other bid) and that the correlation (new bid amount compared to the previous bid amount) satisfies requirement of a specified minimum bid increment (a trigger condition on the correlation as specified in the claim) are both old and well known in the auctioning art.

It would have been obvious to one of ordinary skill in the art in view of the official notice and the cited prior art to extend the auction based upon the correlation between the new bid and the previous bid and based upon a trigger condition as per the claimed invention because this would allow the auctioneer to accept most profitable bid and implementing a trigger condition would filter out those bids which fail to meet reasonable bid increment for the lot being auctioned.

Claim 92. Second time interval varies during the auction (the auction is extended in 10 minute increments, however, at the discretion of the auctioneer this may be changed to any other time amount).

Claims 93, 95-97: (exemplary analysis) overtime extension is triggered if the submitted bid is better than a current best bid.. (any bidding occurring in the final ten minutes inherently considers various factors recited in the present claims. A person of skilled in the art would appreciate that a plurality of conditions are appropriate for triggering extension of the

Art Unit: 3624

auction because the purpose of the auction is to optimize the administration of auction in consideration of time constraints and providing for maximum benefit to the sellers).

The Newsbyte fails to explicitly disclose various criteria for triggering the overtime extension stated in claims 94-97. It would have been an obvious matter of design choice to apply one or more condition related to the submitted bid (within a predetermined amount of another bid as an example per claim 95) or that knowledge generally available to one of ordinary skill in the art would lead that individual to combine such knowledge with the relevant teachings of the cited reference.

All limitations of claims 99 and 102-107 have been analyzed as in corresponding method claims 89 and 92-97. Note that Newsbyte applies to on-line auction and therefore, computer readable medium is inherent in Newsbyte.

All limitations of claims 138-140 and 144-145 have been analyzed in claims 89,92-93, 95-97 as discussed previously.

Per claim 146, the second time interval (3 days + 10 minutes) extends to a second closing time (start time plus (3 days + 10 minutes) instead of 3 days from the start) further comprises:

Defining a third time interval (third time interval = 3 days + (2 times) 10 minutes), a fourth time interval (fourth time interval = 3 days + (3 times) 10 minutes) a second overtime condition..(any bidding occurring in last ten minutes of any

Art Unit: 3624

interval), the third time interval not being equal to the fourth ..(this is obvious from the above explanation);

Determining whether the second overtime condition occurs during the third time interval (the auction is extended in ten-minute increments in response to any bidding occurring in the final ten minutes);

Extending the second closing time by the fourth time interval in accordance with the second determination (the second closing time 3 days plus 10 minutes from the start of the auction is extended to further 10 minutes and so on).

Per claims 147-150 Newsbyte teaches all limitations of claim 147, 148 and 150. Note that first time interval is 3 days, second time interval is 10 minutes before scheduled closing and second time interval is 10 minute, which is extension time.

All limitations of claim 150 are analyzed as per claim 146.

Claim 151: all limitations have been analyzed in accordance with corresponding method claim 89. Note that because Newsbytes discloses an on-line (i.e. internet based) auction, machine-readable medium is inherent therein.

Claim 153. overtime occurs when an amount of the at least one behind market bid is within at least predetermined amount..of another bid (there is no tradeoff for the offerer to extend the auction if the new higher bid received is only numerically higher, which would not justify extending the auction due to cost of associated with extending the auction).

Claims 155, 157 and 158 have been analyzed per claims 151 and 147-149 as above.

Art Unit: 3624

Claim 156: wherein the overtime triggering interval equals the extension time interval (byte, final ten minutes is overtime triggering interval and ten minutes is extension time interval).

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to JAGDISH PATEL whose telephone number is (571) 272-6748. The examiner can normally be reached on 800AM-600PM M-Th.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Vincent Millin can be reached on (571) 272-6747. The fax phone number for the organization where this application or proceeding is assigned is 517-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only.
